

Oak House

Located in the Trough of Bowland, Oak House is a unique hybrid barn of stone block and full bespoke oak frame with floor to ceiling oak frame windows and panoramic views. The KNX installation covers lighting, heating and air conditioning control. It includes scene

lighting throughout and employs concealed halogen dichronic luminaires to highlight the oak beams, entrepice chandliers and mood lamps. Zoned heating and a/c control together with automatic "Welcome Home" lighting are also provided.

Featured KNX products include a Jung 701 Touch Panel central to the building for scenes, four channel heating control and zoned temp control. Jung FD room controllers are used for scene lighting and temp control along with Jung Stainless steal neutral position switches. A Zennio Z38 touch screen is provided for light scenes, temperature and remote control.

The hidden cinema is projected on to an electric screen, 5.1 delivered by discrete B&W ceiling speakers. Scene lighting, temperature control and IR remote control are provided by the Zennio LCD touch panel. Multi-room audio comes from the killer Sonos system, colour display remote, giving access to the music collection in any room independently or in party mode!
