

Call for Papers for the

Conference 2007

15th & 16th November 2007

Fraunhofer Institute IMS, Duisburg, Germany

The KNX-system: ISO/IEC 14543 in theory and practice

KNX Association is looking for presentations on new and exciting KNX system innovations

Members of our industry and universities and/or technical institutes are offered the chance to present their newest developments to other partners and to the KNX members, either in the form of a presentation or by means of a small demonstration panel.

A CD-ROM containing all conference papers will be made available at the Conference and offered for download on the KNX website.

Prospective authors should submit an abstract in English of about one page by the 31st July 2007. Contributions should present recent research and applications focusing on - but not restricted to - the following topics:

- KNX for high energy efficiency
Climate protection with KNX
Use of KNX for disabled persons
KNX and security
KNX and multimedia
KNX and metering
KNX and XML
Further KNXnet/IP innovations
New KNX fields of application
KNX PC Tool evolutions
New KNX products
KNX Radio Frequency
.....

The final paper must be written in English.

Conference Chairs

Fraunhofer Institute IMS
