

The 1st Forum of “ KNX Technology and Application for Home and Building Control”

--Create green, comfortable, energy saving environment for home and office

Invitation

Dear Board Members and Sponsors:

On the 20th anniversary of KNX International, KNX China has participated the 6th Electrical Building Technology Guangzhou Fair with its Board Members (including ABB, Hager, Schneider and Siemens), and have achieved great success. Especially the Workshop held on the fair, attracted lots of audiences and got positive response. For expanding the influence and application needs of KNX standard and technology in China, KNX China will hold the 1st Forum of KNX Technology and Application for Home and Building Control on 14th October, 2010, at the Capital Hotel in Beijing. More than 100 delegates of manufacturers, system integrators, developers, users, government officers will be invited to attend the forum.

The host of the forum is KNX China and China TC of Industrial Process Measurement and Control of Standardization Administration of China (SAC/TC124). The organizer is Instrumentation Technology & Economy Institute P.R.China (ITEI), and the supporters are Board Members of KNX China and KNX International.

KNX -- the worldwide standard for home and building control, is based upon the experience of more than 20 years in the market including its predecessors, EIB, EHS and BatiBus. It is approved as Chinese GB/Z 20965-2007 as well as International standard (ISO/IEC 14543-3). Now it's upgrading to the Chinese GB/T standard. Except for the successful cases of large scale public building, commercial building, office building, flat and villa, KNX has made great contribution to Green Building and Energy Efficiency. It's in accordance with the "Low Carbon, Environmental Protection, Energy Saving" strategy of the Chinese government. We hope to show the advanced KNX technology and new products and cases of our members to all the audiences via the platform

To help the audiences get better understanding of the reports, DEMO display is available.

1. Name

Forum of KNX Technology and Application for Home and Building Control

2. Theme

Create green, comfortable, energy saving environment for home and office

3. Date and Address

October 14th, 2010

Jinyun Hall, 2nd floor, Capital Hotel, Beijing, China

4. Organization

Host:

KNX China

China TC of Industrial Process Measurement and Control of Standardization
Administration of China (SAC/TC124)

Organizer:

Instrumentation Technology & Economy Institute, P.R. China

Supporter:

ABB

Hager

Schneider

Siemens

KNX International

Midea:

Instrument Standardization & Metrology

China Instrumentation

Digital Community & Smart Home

www.qianjia.com

5. Presenters and Audiences

Presenters:

KNX International, KNX China

SAC/TC124

Board Members of KNX China

Ordinary Members of KNX China (Integrators and Users of KNX)

Audiences:

秘书处：机械工业仪器仪表综合技术经济研究所

地 址：北京市广安门外大街甲 397 号

邮 编：100055

电 话：010-63288319 (沈璞) 010-63322090 (李玉敏)

Members of KNX
Partners of KNX (Developers, Integrators, Universities, Scientific and Research Institutes)
Users of KNX
Other Manufactures, Integrators, Agents, Scientific and Research Institutes, Users of Smart Building

6. Content and Range of Presentation and DEMO (Companies may register according to the following topics)

- 1) Introduction of the organization, standard, technology, testing and certification of KNX
- 2) Exchange technology of the applications and solutions of KNX
 - a. Energy saving application of KNX system in public buildings (airport, subway, stadium, and so on)
Discuss energy saving solution about lighting, shading, indoor environment control in public buildings.
 - b. Green solution of KNX system in office buildings
Introduce the energy saving solution of KNX about lighting, shading, ventilation in office building
 - c. Comfortable solution of KNX system in hotels
About banquet hall, public area, and room control to realize safe, reliable, comfortable and energy saving management of hotel.
 - d. Comfortable, safe home control of KNX system
About flexible, comfortable, convenient home control of KNX system, fashionable and friendly control interface.

7. Sponsors' benefits

- a. Show the image and strength of the company through presentation and DEMO, attract investors and partners by the assistance of this platform.
- b. Introduce the new technology, new products and successful cases of the company through presentation.
- c. Display new product in the exhibition area for free.
- d. Promoting materials and Logo of the company will be shown in the forum documents and supporting medium.
- e. The PPTs presentation (unless security needs) and audiences data will be available after the forum.

8. Draft Time Table and Registration Form
