**KNX – The worldwide STANDARD for
home and building Control**

Information

Especially in times of higher awareness for the environment, the efficient use of energy became a key topic. Terms, like Green Buildings, Smart Grids and Smart Metering can be found more often regarding home and building control.

Studies have shown that the market for home and building technology is a market with a bright future, many opportunities and high potentials for developments. KNX, as the worldwide STANDARD for Home and Building Control (ISO/IEC 14543), already plays the major role in worldwide market. Proven by more than 240 members all over the world, KNX is the leader in the worldwide Home and Building Control market. Due to the higher demand for KNX devices, the higher awareness for environmental topics and the developments of the Singapore market, the KNX International Association is organizing the informative Session about:

**“KNX – The Worldwide Standard for Home and Building Control
Welcome to the World of Greener Buildings”,
On Thursday, 15th of September 2011
At Suntec Convention Centre
(Same venue as BEX Asia, Room 314).**

We would like to invite you and your business partners to this Session. This Session will give you the opportunity to:

- Learn about the benefits and the opportunities the KNX Standard can provide you at first hand
- Have direct discussions with representatives of the KNX Association together with its partners.

Participation's Fee

The participation at the Session is **Free of Charge**. Please take into consideration that the attendees' limitation is 110 Persons. For planning reasons please let us know until the 8th of September, if you would like to attend the KNX Session under the following email address: *christian.stahn@knx.org*
