KNX – The worldwide STANDARD for home and building Control

This Event is supported by:

Information

Especially in times of higher awareness for the environment, the efficient use of energy became a key topic. Terms, like Green Buildings, Smart Grids and Smart Metering can be found more often regarding home and building control.

Studies have shown that the market for home and building technology is a market with a bright future, many opportunities and high potentials for developments. KNX, as the Worldwide Standard for Home and Building Technology (ISO/IEC 14543), already plays the major role in worldwide market. Proven by more than 230 members worldwide, KNX is the leader in the worldwide Home and Building Control market. Due to the higher demand for KNX devices, the higher awareness for environmental topics and the developments of the Singapore market, the KNX Association International is organizing

“The 1st Singapore Forum of KNX Technology and Application for Home and Building Control – Create Green, Comfortable, and Energy Saving Environment for Modern City Life”, on Wednesday, 1st of June 2011 at the Marina Bay Sand Hotel.

We would like to invite you and your business partners to this conference. This conference gives you the opportunity to:

- Have discussions about KNX with companies and Partners, such as ABB, Cytech Technologies, Schneider Electric, Siemens, etc.
- Learn about the benefits and the opportunities the KNX Standard can provide you at first hand

Participation's Fee

The Participation at the Forum is **Free of Charge**. Please take into consideration that the attendees' limitation is 100 Persons. For planning reasons please let us know until the 22nd of May if you would like to attend the KNX Forum under following email address:
