

# Homira

# HomeGlow Pro User Guide

Take control with a stunning large screen, managing lighting, climate, AV, security, and more — all from one central hub.

# Main Interface

## Top Bar

Displays time, weather, and indoor environment.

## Security

One-tap shortcut to arm or disarm the system.

## Status Icons

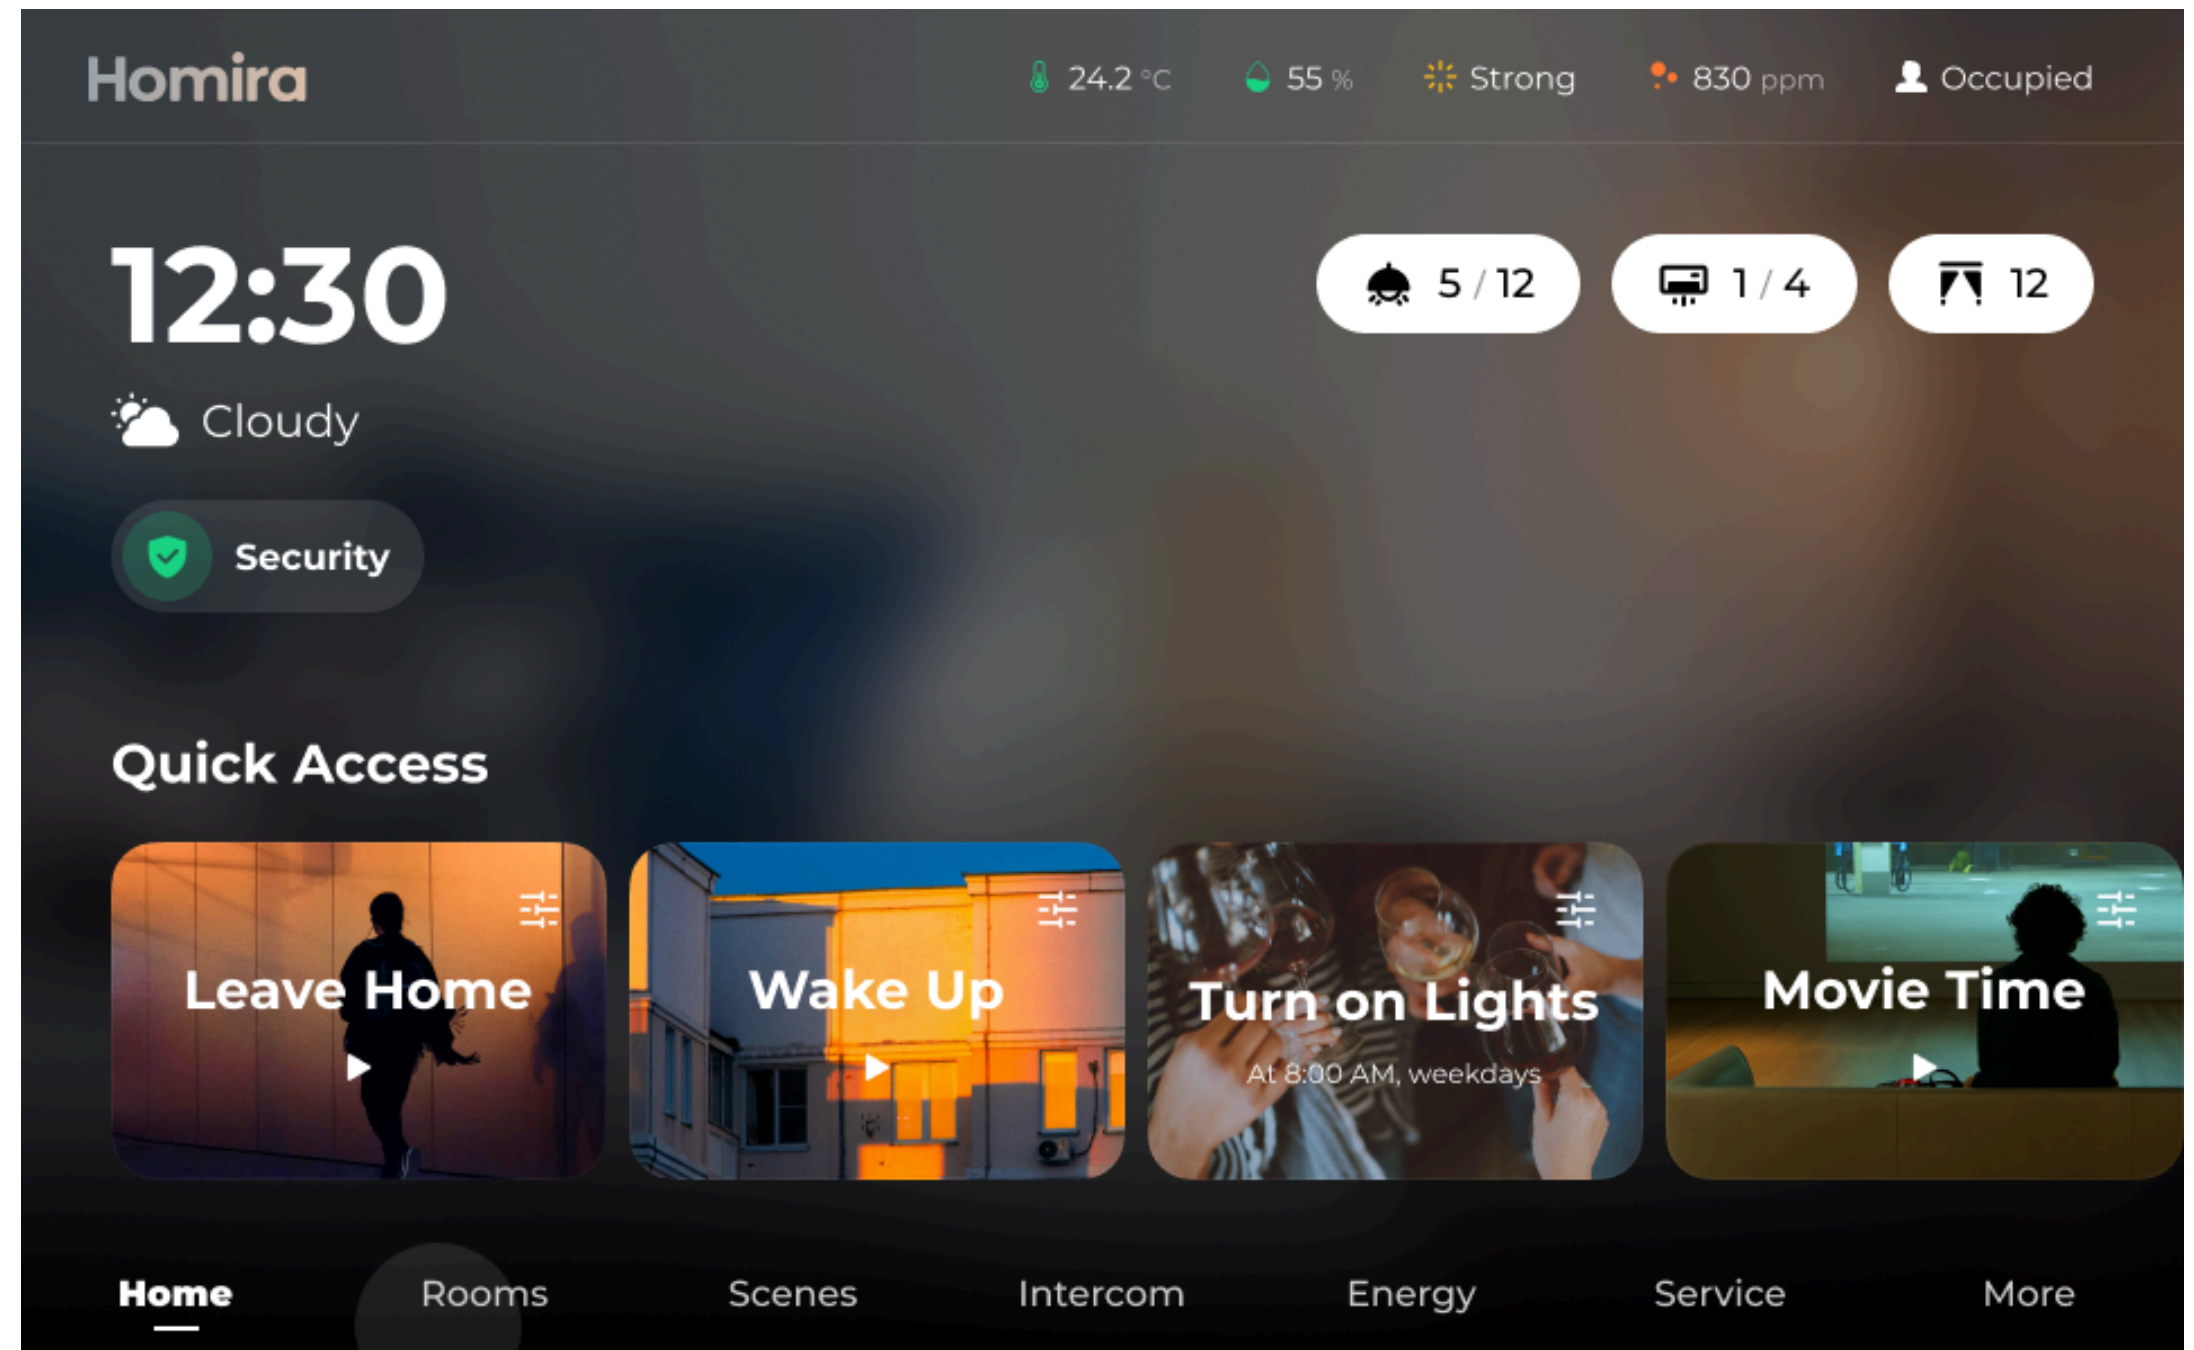

Quick overview of connected devices — lights, climate, and blinds.

## Quick Access

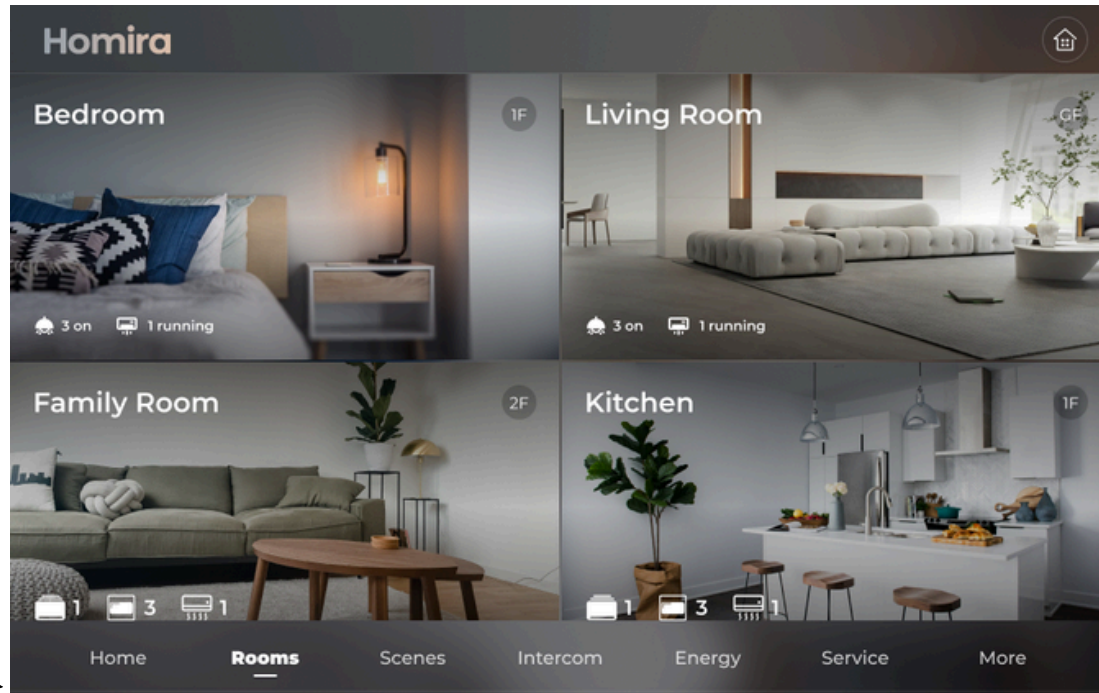

Shortcut area for frequently used scenes, allowing fast scene control (e.g., Home, Away, Sleep, Cinema).

## Bottom Menu

Navigate between Home, Rooms, Scenes, Intercom, Service, and More settings.

# Basic Operations

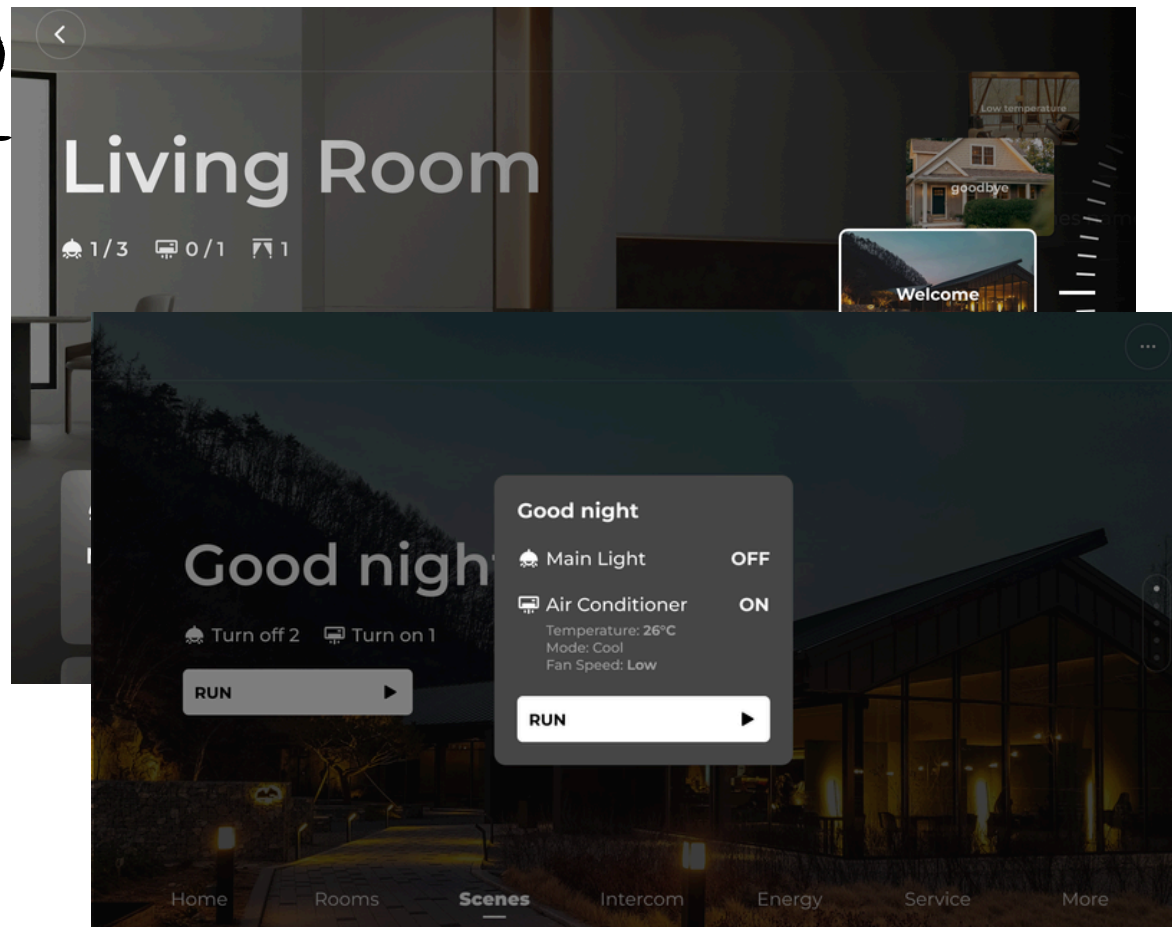

## Multi-area Control

Browse through the list of rooms to view and manage all devices in each area.

This gives you a clear overview of your home and allows quick access to lights, climate systems, curtains, and other connected devices room by room.

## Scene-based Control

Each room supports one-tap scene switching. Common scenes such as Home, Away, Sleep, or Cinema can instantly adjust multiple devices together, saving time and providing a consistent experience.

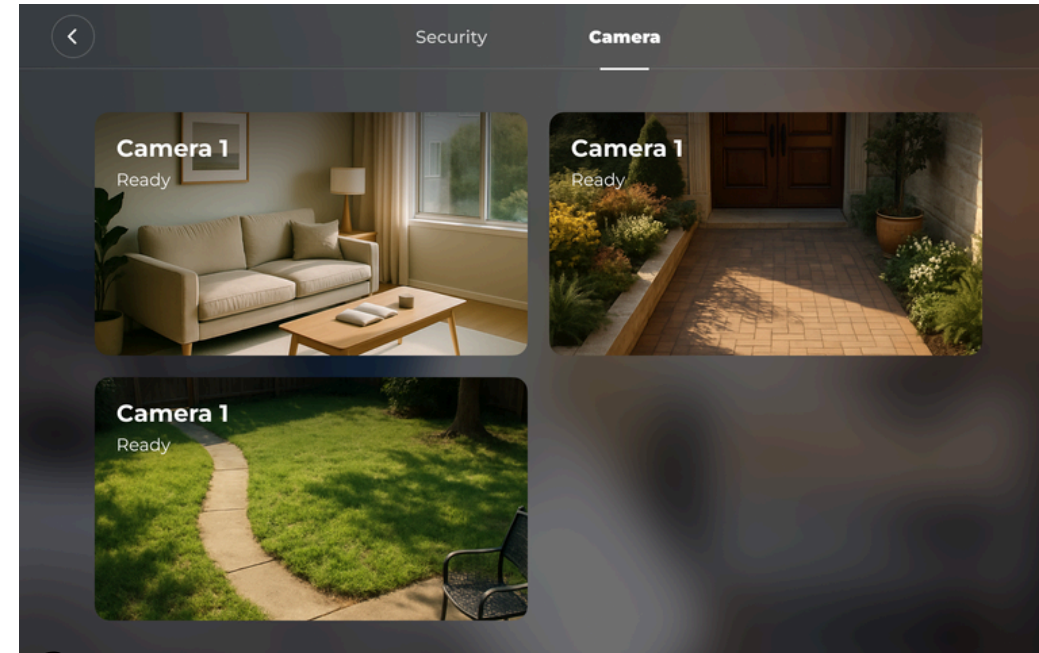

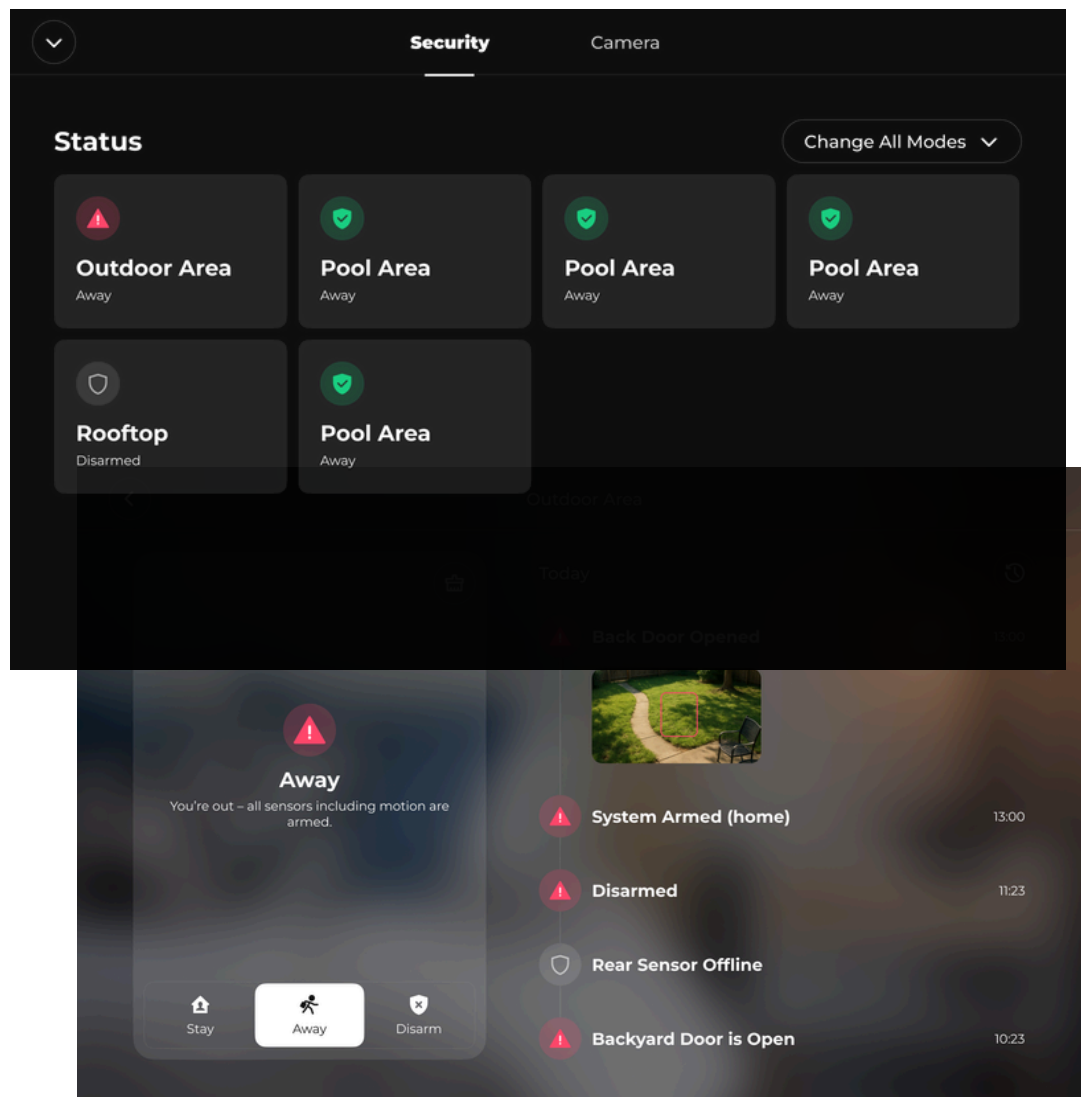

## Device Control

Within each room you can directly control individual devices such as air conditioning, lighting, or curtains and blinds, keeping everything centralized on the panel.

## Alarm

Control your security system by zones.

You can arm or disarm specific areas (e.g., living room, bedroom) or the entire home for flexible protection.

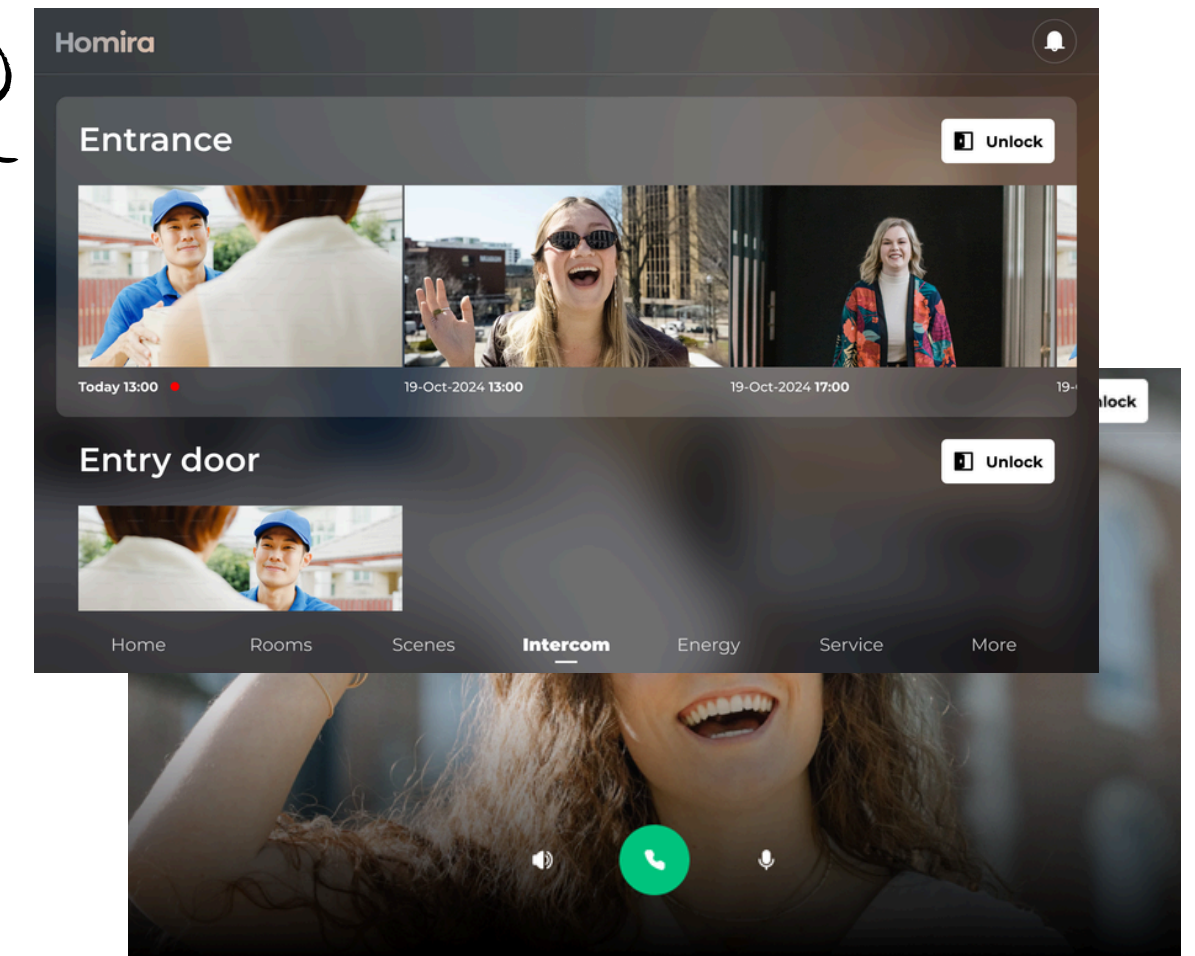

## CCTV Monitoring

View live video feeds from connected cameras directly on the panel. Quickly check entrances, common areas, or any location equipped with CCTV.

## Intercom

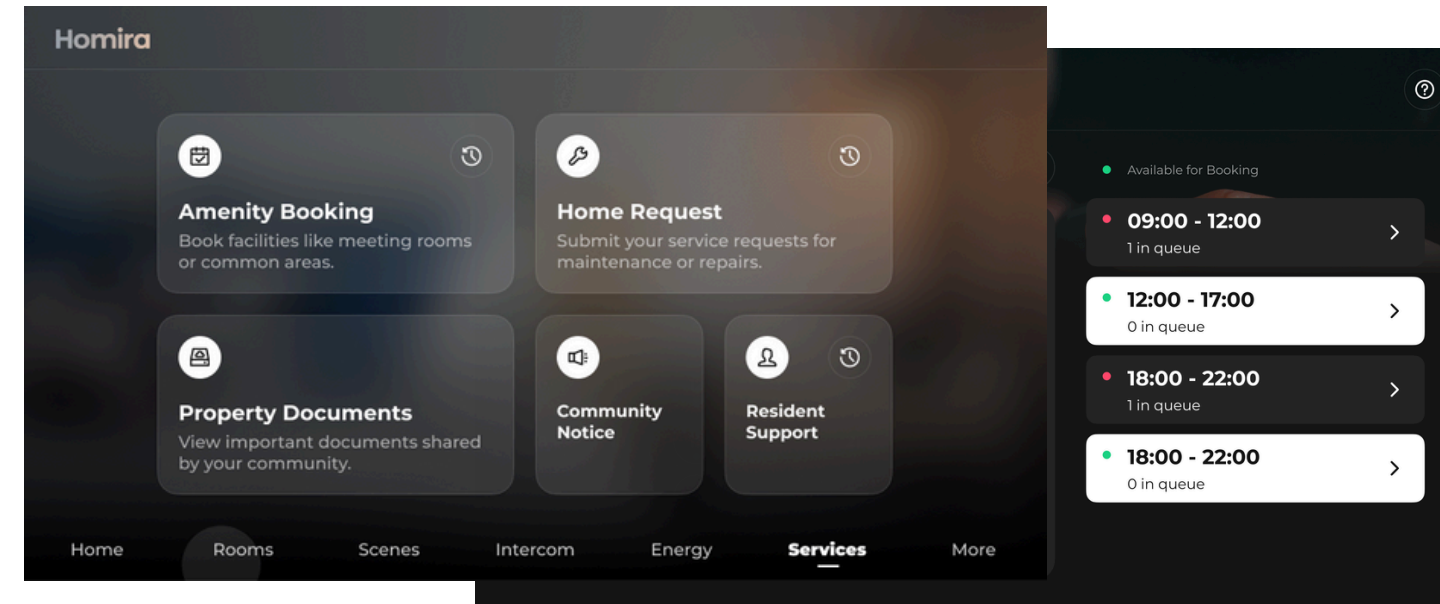

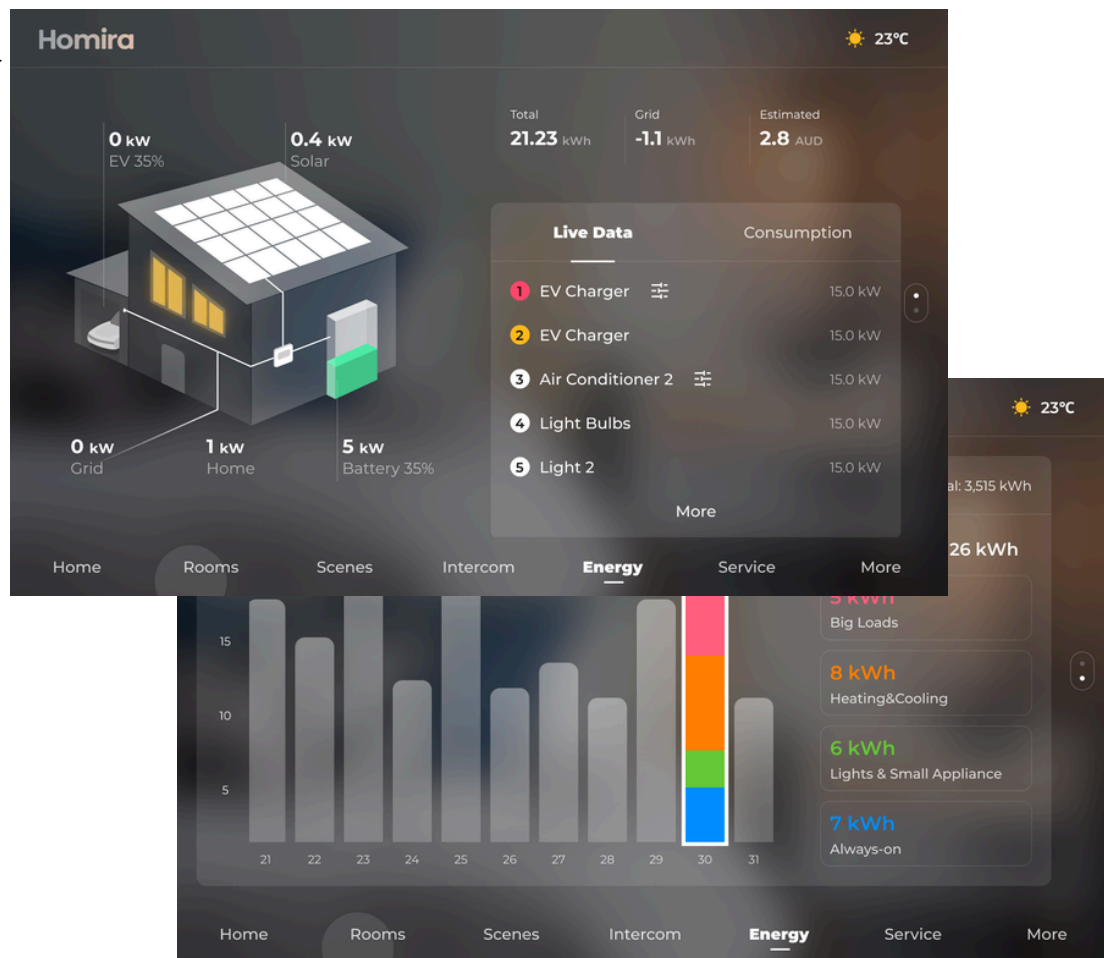

Use the built-in intercom to communicate with visitors at the door or connect with other panels in the home.

Supports video calls, door release, and integration with building intercom systems.

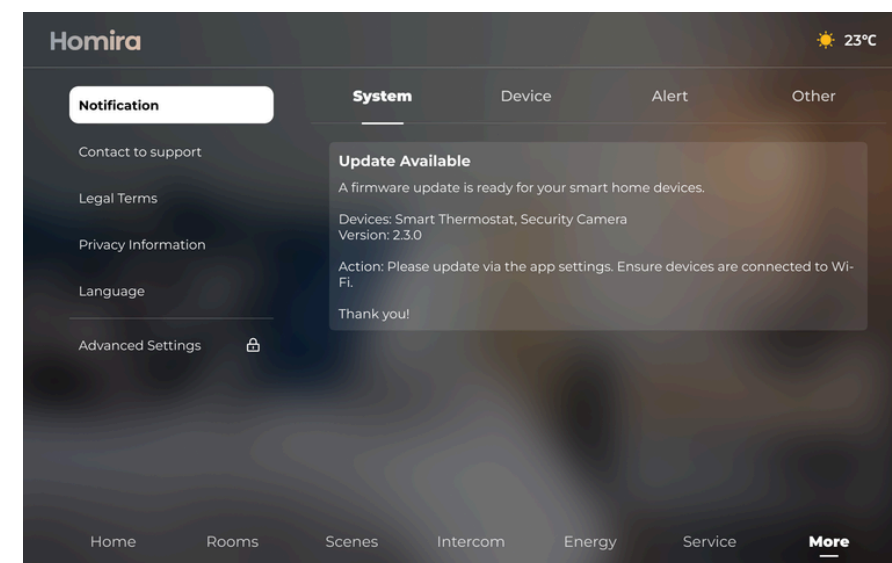

## Energy Management

Monitor and schedule your home's solar and battery system. Track key loads such as air conditioning or EV charging, and optimize energy use with intelligent scheduling.

## Community Services

Access resident services directly from the panel, including issue reporting, community notices, and facility booking. Availability of these features depends on community activation and management setup.

## System Settings

Configure essential system preferences such as notifications, Wi-Fi connection, language, and software updates.

# Advanced Features & FAQ

## Advanced Features

- **Remote control:** Stay connected wherever you are — manage lighting, climate, and security anytime via the Homira App.
- **Voice assistants:** Equipped with built-in microphones designed for voice wake-up and on-panel commands. Availability of this function depends on regional support and software activation.
- **OTA updates:** Enjoy continuous improvements with over-the-air updates, keeping your panel secure, reliable, and always up to date.

## FAQ

**Q: The panel does not power on.**

→ Make sure the device is connected to PoE or AC power. If the screen remains off, restart by holding the power button for 5 seconds.

**Q: The panel cannot connect to the internet.**

→ Check if your Wi-Fi password is correct or confirm the Ethernet cable is firmly plugged in. You can also restart your router.

**Q: Some devices are not responding.**

→ Ensure the devices are properly added to the system and that the network is stable. Try refreshing the device list in the app.

**Q: The touchscreen feels unresponsive.**

→ Clean the screen with a soft cloth and restart the panel. If the issue continues, please contact Homira support.

**Q: How do I update the system?**

→ Go to More > Advanced Settings > Version. The panel will automatically check for the latest version and install it over the air.
