KNX Secure Product by Eelectron: IO16F01KNX

The IO16F01KNX has 16 inputs/16 outputs, 16A rated module for lights, fan coils, venetians and valve controls. It controls up to 4 analogue inputs, has manual control and an SD card to save ETS configuration for fast recovery. The product supports KNX Data Secure, allowing ETS security activation over Group Addresses with data protection password. The device allows: device authentication, where sender MAC address is decrypted and authenticated to avoid fraudulent message replication; message confidentiality, where message content is encrypted and decrypted from authorised receivers; or both.
