

Release Notes for Shift Addresses 4.0 (Build 441)

1 General information

Please check web site <http://www.knx.org/knx-tools/ets-apps/features/?developer=IT+GmbH/> for new Shift Addresses versions!

1.1 Operating systems

Windows XP SP3/Windows Server 2003, Vista/Windows Server 2008, Windows 7/Windows Server 2003 R2, Windows 8 and Windows 10, all 32 or 64 bit are supported.

1.2 Installation

You need ETS4 since Version 4.1.7 or ETS5 since Version 5.0.2.

If you have an older Shift Addresses version, please uninstall this one first via setting panel in ETS

2 Important changes since previous release

2.1 Changes since Release 4.0.350.0.

- FIX: In ETS5.0.6 a group address could not be moved into another main group or middle group or group range without changing group address part of address (e.g. 1/250 -> 2/250)
- FIX: Formatting free group address style in preview
- Adaption to ETS5 layout

2.2 Changes since Release 4.0.261.0.

- Works also in ETS5

2.3 Changes since Release 4.0.47.0.

- FIX: even for two level group address style the upper limit of start address was 255.
