

KNX Executive Board (KEB)

The KNX Executive Board (KEB) is elected amongst the members by the KNX General Assembly. The Board is responsible for the association's strategy, both technical as well as commercial. It supervises the activities of the KNX Technical Board and the KNX Marketing Board. At the beginning of each year it prepares and approves a budget proposal, which is later submitted for approval to all members in the framework of the KNX General Assembly.
